

Healthy Feet Programme

Lameness Healthy feet programme

An understanding of which types of lameness are present, coupled with a structured approach to tackle the underlying causes is required to tackle lameness effectively.

The AHDB Dairy Healthy Feet Programme is a structured approach which will help make important progress towards diagnosing the problems, devising an action plan, and develop the skills necessary for long-term lameness control. The approach is based around the 'four success factors' ? Low infection pressure ? Good horn quality and hoof shape ? Low forces on the feet ? Good cow comfort and cow flow ? Early detection and prompt, effective treatment of lame cows

Foot trimming training days

We offer hoof trimming training days that cover the 5-step foot trimming technique, recognition, treatment and prevention of foot lesions in cattle. Watch out for announcements about our foot trimming courses.

Our next foot trimming April 5th, to book onto the 1 day course, please call 01772 861300 or contact farm@oakhill-vets.com.

INTRODUCTORY CATTLE FOOT TRIMMING

This 1 day course will introduce participants to the basics of lameness recognition and treatment. The course will include a mix of classroom sessions and wet lab practical teaching at Oakhill. This course is aimed at those wanting to develop their treatment approach to the individual lame cow.

Run by Katherine Lang & Holly Critchley, this course is limited to 6 people.
